## Election/Restrictions

- 3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to a treated and isolated IgG fraction, classified in Class 424, subclass 130.1.
  - II. Claims 8-10, drawn to a method of providing bacterial static and viral static activity comprising oral dosing of a mammalian species with anti-bacterial and anti-viral composition, classified in Class 424, subclass 130.1.

The inventions are distinct, each from the other because of the following reasons:

A. Groups I and II are related as product and process of use.

In the instant case, the isolated bovine IgG fraction can be used for various binding assays as well as anti-bacterial and anti-viral treatment as claimed. Therefore, they are patentably distinct.

4. Because these inventions are distinct for the reasons given above and the searches are not coextensive, restriction for examination purposes as indicated is proper. Application/Control Number: 09/772,603

Art Unit: 1644

5. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
